Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7 and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Azkona (6199459).

Azkona discloses all of the claimed subject matter as broadly claimed by applicant. Note that the ridges of Azkona are located "around the slot" in as much as applicant's ridges are located around the slot.

3. Claims 7-8, 10, and 12-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hastings et al (4438669).

Hastings et al discloses all of the claimed subject matter as broadly claimed by applicant. Note that the ridges of Hastings et al are located "around the slot" in as much as applicant's ridges are located around the slot. The tongue element is "rocker shaped" as broadly claimed. Note that claim 4 does not define a rocker function, only a shape.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hastings et al or Azkona in view of Schaffner Jr (GB 2166382).

Hastings et al or Azkona disclose all of the claimed subject matter except for having curved ridges. Schaffner Jr discloses the use of curved ridges. It would have been obvious to one having ordinary skill in the art to form the ridges of Hastings et al or Azkona as curved as such would have been an obvious variation in shape for engagement between ridges and a tongue element as taught by Schaffner Jr.

Note MPEP 2144.04:

"B. Changes in Shape

In re Dailey, 357 F.2d 669, 149 USPQ 47 (CCPA 1966) (The court held that the configuration of the claimed disposable plastic nursing container was a matter of choice which a person of ordinary skill in the art would have found obvious absent persuasive evidence that the particular configuration of the claimed container was significant.)."

6. Claims 1-6 and 14-20 are allowed.
7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Debra S Meislin whose telephone number is 571 272-4487. The examiner can normally be reached on M-F, alt. Fridays off.
